University partnership sales pipeline analytics

Leadership review | October 2025 to September 2026

Pipeline hygiene before expansion

Harsh Vardhan Tomar
Python, SQLite, Streamlit and Excel

The institutional sales decision

A fictional Indian EdTech company needs a consistent account review process

Which universities deserve the next outreach effort?

Where does the opportunity funnel stop progressing?

How much new partnership value could sign next quarter?

Managers need explicit metrics before allocating sales capacity.

Reproducible portfolio dataset

Real Indian geography with fictional institutions and commercial records

600

institutional prospects

4,399

sales activities

1,971 stage entries · 57 contracts · 12 months
15 states and UTs · 6 territories · 8 representatives

Commercial results at the snapshot

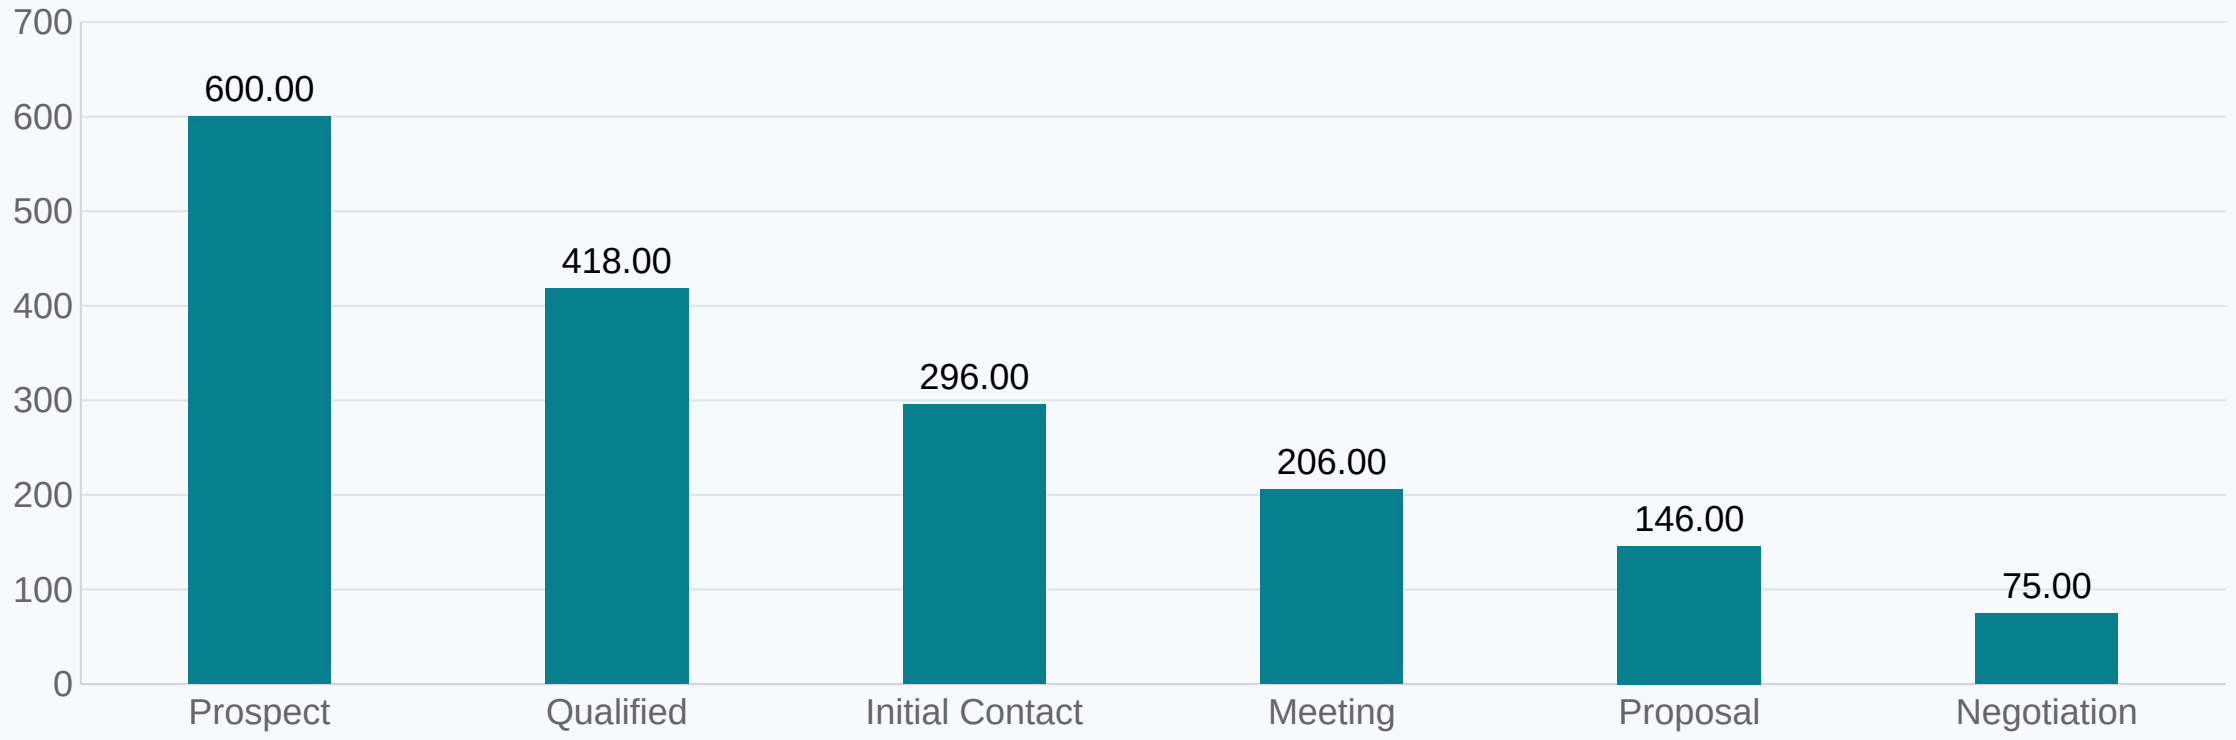

Signed contract value and recognized service revenue answer different questions

INR lakh; 370 open opportunities; 57 wins; closed-deal win rate 24.78%

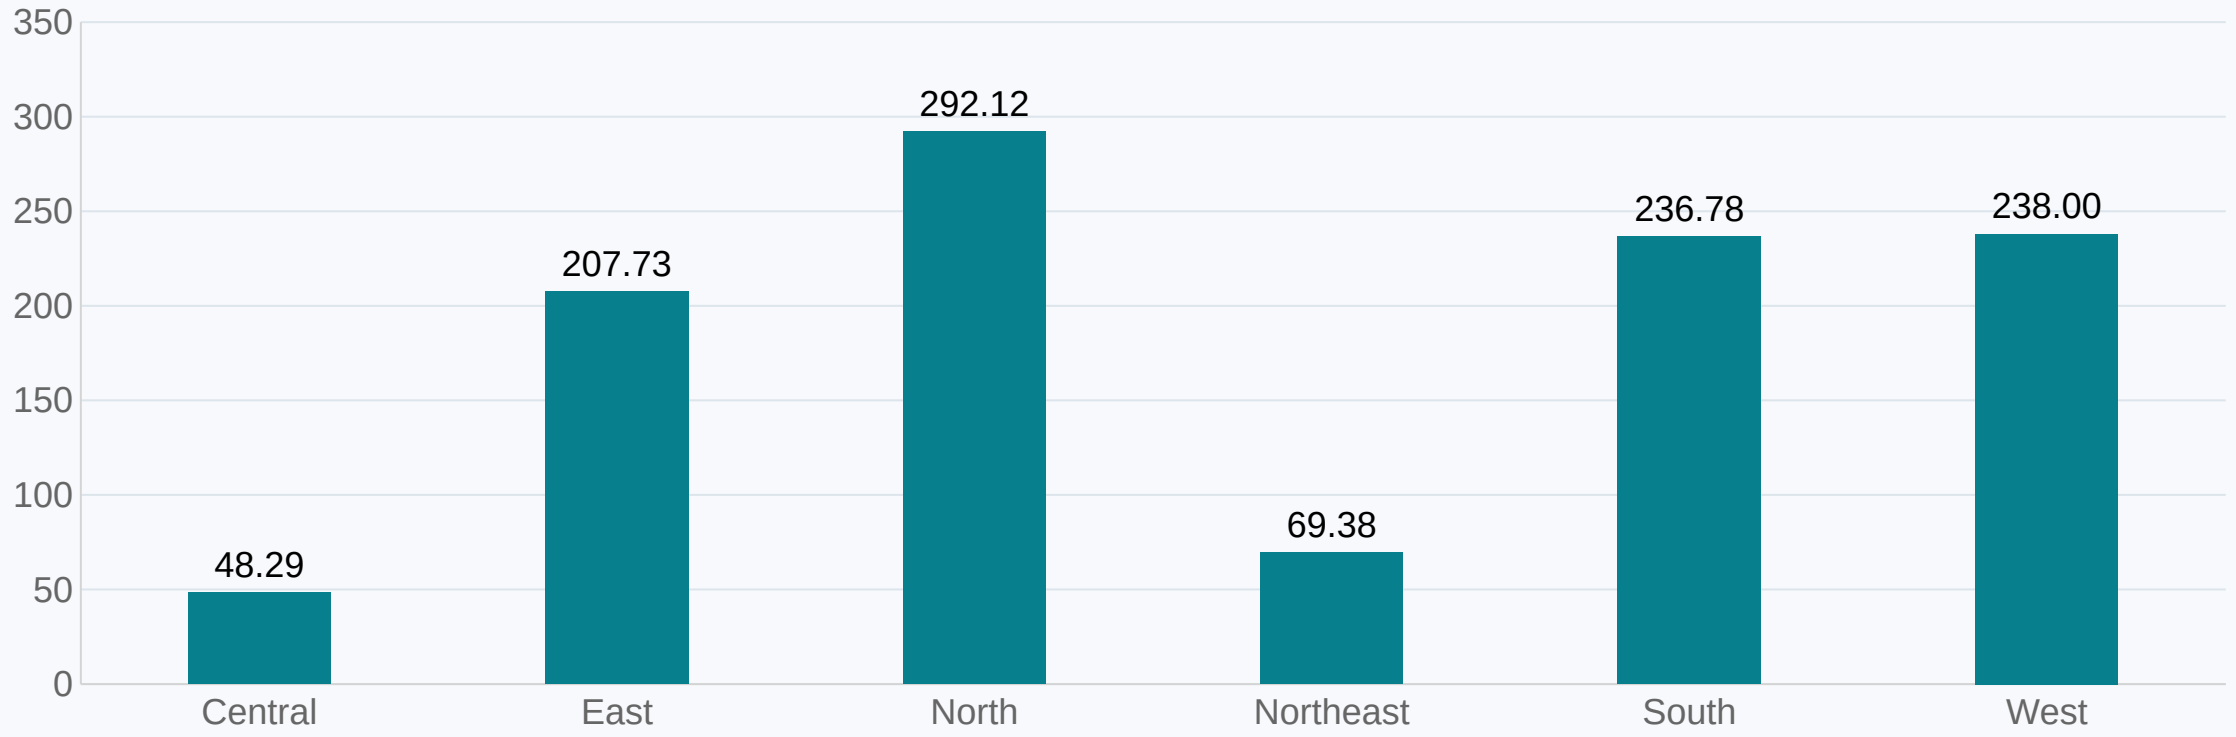

Proposal conversion needs review

75 of 146 proposal-stage opportunities entered Negotiation: 51.37%

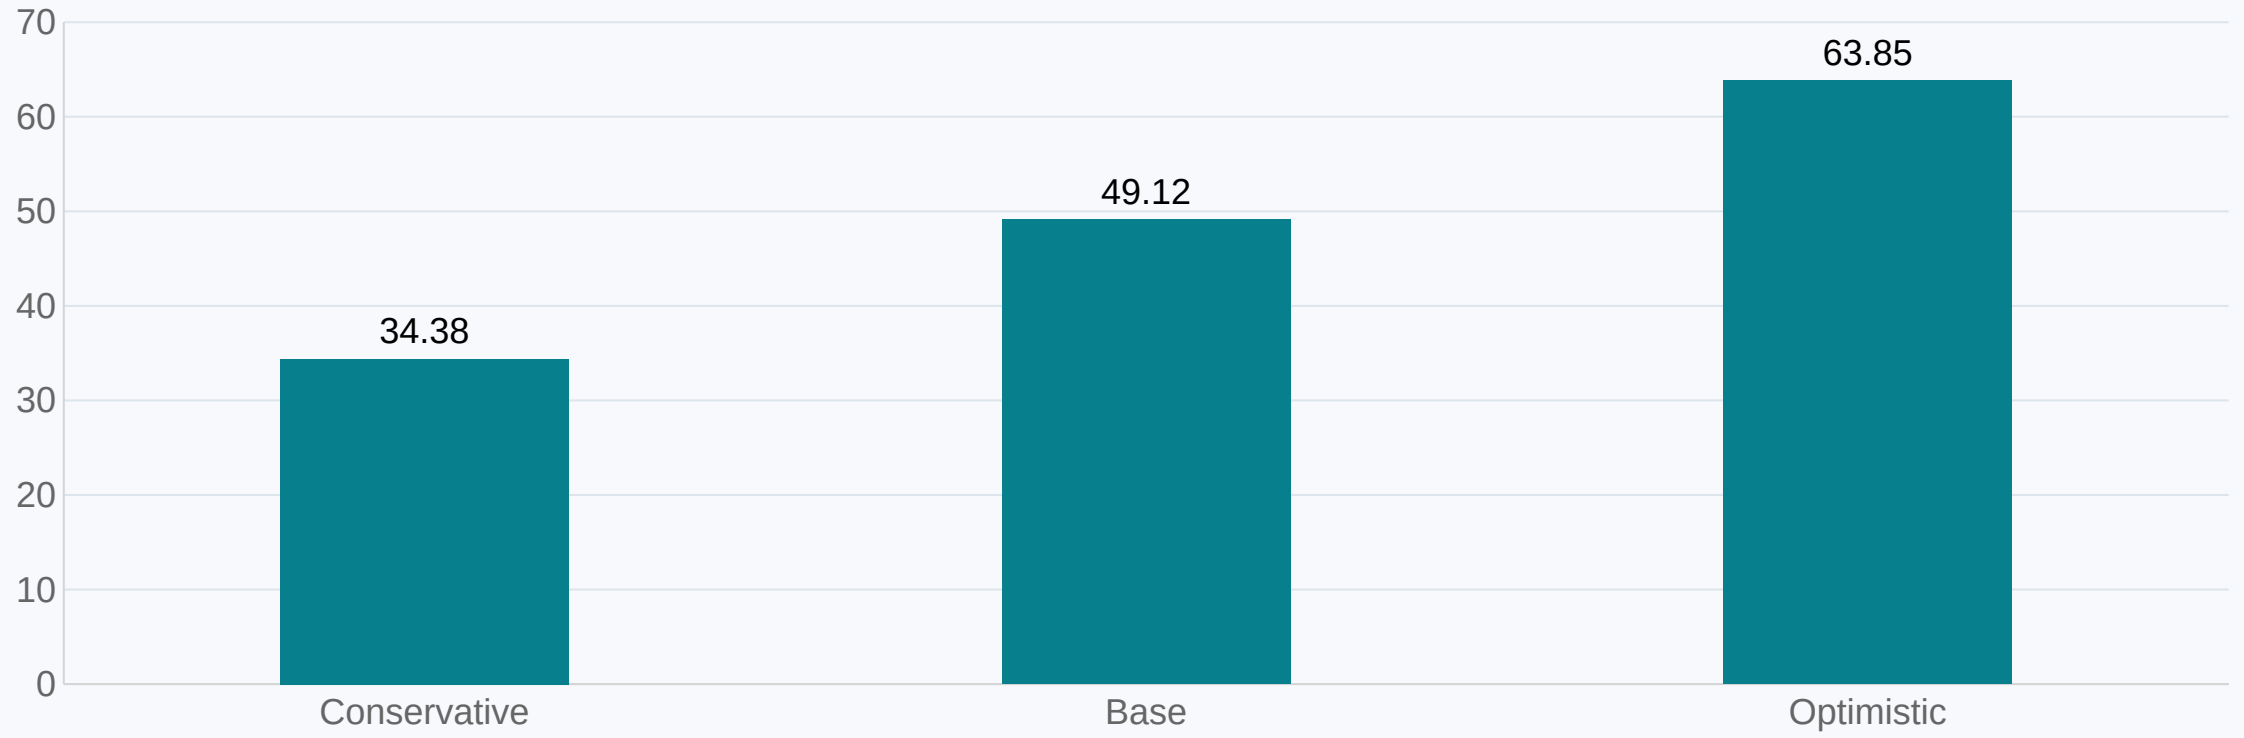

Territory coverage and backlog

Active pipeline in INR lakh. North has 57 overdue actions
