Sales performance business review

CampusBridge Demo | Management review | 01 October 2025 to 30 September 2026
Prepared by Harsh Vardhan Tomar | All commercial records are simulated

Prioritise pipeline hygiene before expanding outreach. The simulated team has 370 open opportunities, but 270 have spent more than 30 days in their current stage and 222 have overdue next actions. A large gross pipeline therefore does not justify treating every deal as near-term revenue.

Measure	Snapshot result
Institution prospects / activities	600 / 4,399
Active pipeline	INR 109,230,000
Signed partnership value	INR 16,886,000 across 57 wins
Recognized service revenue	INR 5,736,156.17
Closed-deal win rate	57 / 230 = 24.78%
Average won deal / mean won cycle	INR 296,245.61 / 124.93 days

Conversion bottleneck

Proposal Sent to Negotiation has the lowest observed adjacent-stage conversion among stages with at least 20 entries: 75 of 146 opportunities, or 51.37%. Review scope clarity, procurement objections and the next decision date. Recent opportunities remain unfinished, so this ratio is not a final probability of progression.

Territory allocation

North holds INR 29,212,000 of active pipeline and 57 overdue actions. South has 16 wins out of 47 closed deals (34.04%), compared with East at 5 of 38 (13.16%). These differences are descriptive simulation results. Lead mix and deal maturity must be considered before reallocating staff. Clear North’s backlog and examine East’s loss reasons before a new territory pilot.

Forecast and management actions

Q4 2026 scenario	New signed value INR
Conservative	3,438,260
Base	4,911,800
Optimistic	6,385,340

The forecast covers 108 open opportunities expected to close in October–December 2026. It excludes 224 past-due deals carrying INR 70,993,000 and deals scheduled after the quarter. Stage probabilities are assumptions: 3%, 10%, 18%, 30%, 50% and 70%. Conservative and optimistic scenarios scale them by 0.7 and 1.3, capped at 100%. These are bookings scenarios, not confidence intervals or recognized-revenue estimates.

Owner	Next review action	Metric to monitor
Sales representatives	Validate overdue tasks within 7 days	222 overdue opportunities
Sales manager	Requalify stalled deals at weekly review	270 opportunities >30 days in stage
Commercial lead	Audit proposal objections	75 / 146 advanced to Negotiation
Sales operations	Refresh expected close dates before forecast	224 past-due open deals
Territory lead	Review account O0426 and confirm next step	80.16 priority score; INR 1,223,000 potential

Evidence and limits

Source: data/partnerships.sqlite and data/summary.json, deterministic seed 20261017. SQL and Python reconcile signed value and accrual. The dataset has one opportunity per institution, forward-only stages and constant opportunity values. No causal improvement, real client result, market-size estimate or model accuracy is claimed. Full formulas and denominators appear in docs/KPI_DEFINITIONS.md.
